

**SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR  
BUILDING COST MATRICES IN A SUPPLY CHAIN MANAGEMENT  
FRAMEWORK**

5

**ABSTRACT**

A system, method and computer program product are disclosed for utilizing cost models in a supply chain utilizing a network. At least one item to be distributed is identified  
10 utilizing a graphical user interface. A cost model is associated with the item utilizing the graphical user interface. The graphical user interface is then utilized to determine a time frame during which the cost model is valid. The cost model identifies a contract cost, an invoice cost, and a landed cost associated with the distribution of the item.
